

from 24" down, brushes the cloth in a flattened web, works on both sides at once, cleans off the specks, burrs, seeds, etc., raises a nap, restores the pliancy and softness — of which the washing has deprived the goods — and leaves the web in a smooth roll ready for the cutter.

The goods are smoothly stretched both in length and width over a roller having a firm and true surface. The brush cards are attached to a wooden roller, the bearings of which are adjustable parallel with the cloth roller. A lever on the left allows the pressure to be relaxed when a seam occurs.

Fig. 1800.

Napper and Brusher.

Nap'per. A machine for cleaning, napping, and surfacing hosiery goods.

It consists primarily of a roller on which the goods are flatly stretched, and a brush, consisting of card clothing, applied to the cloth. The machine takes in any width of cloth,
