

Kantklossen Techniek (Bobbin Lace Technique with Simple Examples); by L. J. De Jager-Meezenbroek; in Dutch; no date; Pub. Eska, Utrecht

Reviews:

Of the series of four beginner books published in Dutch, this is the most advanced, progressing from variations on the common beginner's learning strip of CT, CTC, CTCT, etc to tallies and leaves. However, the overall designs are simple and well illustrated, so should present no problem even to those who do not read Dutch.
