

*At a meeting of the PENNSYLVANIA SOCIETY FOR THE PROMOTION  
OF MANUFACTURES AND THE MECHANIC ARTS, held May 15th,  
1832, it was*

*Resolved, That the friends of Domestic Industry who assembled in Convention in October last, be requested forthwith to call public meetings at their respective places of residence, in order to remonstrate against the Tariff Bill proposed by the Secretary of the Treasury.*

Sir—"The Pennsylvania Society" have instructed us to address you with the foregoing resolution, and to represent their conviction, that a prompt and firm expression of the voice of the people, conveyed in memorials to Congress, without delay, can alone save our country from the serious blow about to be inflicted on its prosperity by the proposed bill of the Secretary of the Treasury.

By this bill the wool grower will be destroyed. Wool now pays a duty averaging 65 per cent., and by the new law will pay only 5 per cent. on the coarsest, and 20 per cent. on the middling and fine qualities. Under the present protection, of 65 per cent., American wool, in 1830 and 1831, only averaged 40 cents per pound.

To complete the ruin of this great agricultural interest, woollen goods, which now pay a duty of 36½ per cent., are to be admitted at the same duty as wool—viz: 20 per cent.; thus destroying at one blow, the grower, carder, spinner, and dyer of wool. Those manufacturers who shall continue their business, and they will be but few, will not want American wool, as it will be much cheaper for them to use foreign woollen goods.

The woollen manufacturers will also be seriously injured, and many of them destroyed. Their coarse cloths now protected by duties of 55-56 per cent., are to pay only ten per cent.; and the finer cloths are reduced in the duties from 38 to 20 per cent.

The manufacture of Sericets, which consumes two-thirds of all the wool used in factories in the United States, at least 20 millions of pounds, will be destroyed; the protection on the great bulk of them being reduced from 48 per cent. to 10 per cent.

Cotton goods, of which little or none is now imported, is reduced from 100 to 25 per cent. Under the new duty, Nos. 15 to 20, which cost in England 17 cents, will pay only 4½ cents per pound duty, and can be imported to sell at 23 cents per pound. Many other articles, of which some are imported, from their being fully protected, and from their being an ample supply at home, are now to come in at low duties of 20 and 15 per cent., and in some cases, *free of duty*.

Nearly all the mechanical and manufacturing interests of the United States are attacked by this bill—most of them being seriously injured, and many of them being entirely destroyed.

The duties on that national article, Iron, and its manufactures, are also considerably reduced by this bill. While protection is thus taken away from our mechanics, manufacturers, and laborers, a bounty is to be paid to merchants and navigators on every ton of their vessels. The whole scheme is an attack upon the wages of the laboring classes, for a reduction of protection is a reduction of their wages.

The tendency of this bill is to deprive the American farmer, laborer, and mechanic, of employment, for the benefit of the farmers and laborers, and mechanics, of foreign countries.

The surplus revenue of the treasury will not be lessened, but will be for a time greatly increased, until the poverty of the people prevents them buying foreign goods.

The protection of American labor was enacted by the votes of its citizens—it is by their voices, loudly and promptly proclaimed to their representatives in congress, that they can avert the ruin which threatens them.

We annex a statement of the present duties on most of the articles imported into the United States, with the duties as proposed by Mr. McLane, showing the reduction of protection.

We remain, &c.

CHARLES J. INGERSOLL,  
LEWIS WALN,  
JOHN R. COATES,  
JAMES MOTT,  
J. F. LEAMING,

Committee.

PHILADELPHIA, May 15th, 1832.

## STATEMENT,

*Showing that under a duty of 20 per cent. our Wool will not bring 40 cents per pound.*

The cost of importing foreign Wool, in 1832, is as follows:

British South Down, which interferes with our common to half blood wool, costs in England, 9d. to 1s. sterling; say 1s. or 22 cents.	Ship- ping charge, 4 per cent., 80-100, cost abroad	Cts. 21-20 per lb.
Charges—freight 2 per cent., exchange 10 per cent., loss of interest 3 per cent., insurance 1½ p. c. and other expen- ses 1 per cent., say 17½ per cent.,		Cts. 4.00
New duty 20 per cent., on 22 cents 80-100,		4.56
		— 8.56
		Cts. 31.35-100

Cost here, with all charges and interest, 31 cents 36-100 per lb.

The present price of American common and half blood is about 40 cents, and if Mr. McLane's bill passes, will fall to 31 or 33 cents, or lose 7 to 8 cents.

The charges on importing wool are about 37½ per cent., at a duty of 20 per cent.

The wool costing abroad so high as 18d. or 23 cents, can be imported at 40 cents per pound.

And at this price the following wools may come in—

English Merino, washed fleece, costing	1s. 3d.=15d.	22 cents.
" South Down,	9d. to 1s.=12d.	22 "
" Flannel Wool,	In.=12d.	22 "
Spanish Cachem, in London,	all charges in	1s. 3d.=15d.
" Espanadura, do.	London add.	22 "
" Lamb', do.	ed except	1s. 3d.=15d.
Portugal, common,	duty.	22 "

Besides these, the wools from the Cape of Good Hope, Jutland, Suyma, and South America, all interfere with and lower the price of American wool, together with the wools from Germany and Austria, which compete with our flannel.

Fifty cents per pound, on an average, is not a compensation to the farmer who does not live near a large city, where the meat is valuable.

The annual cost of keeping a sheep, in the common way, is \$1. 2½ pounds of washed wool, at 40 cents, gives this sum—and the farmer has only the increase for his capital employed, and risk of loss from dogs, accident, and sickness.

Prices of wool in New York, May 10th, 1832, and falling: the duty averaging on the foreign 65 per cent.
