# UNITED STATES PATENT OFFICE.

JOHN THOMAS BARON, OF PROVIDENCE, RHODE ISLAND, ASSIGNOR TO  
FARNSWORTH, HOYT & COMPANY, OF BOSTON, MASSACHUSETTS.

## DESIGN FOR A WOVEN FABRIC.

SPECIFICATION forming part of Design No. 34,119, dated February 19, 1901.

Application filed December 29, 1900. Serial No. 41,543. Term of patent 7 years.

*To all whom it may concern:*

Be it known that I, JOHN THOMAS BARON, a citizen of the United States, residing at Providence, in the county of Providence and State  
5 of Rhode Island, have invented and produced a certain new and original Design for a Woven Fabric; and I do hereby declare the following to be a full, clear, and exact description of the invention, such as will enable others skilled  
10 in the art to which it appertains to make and use the same.

My invention relates to a new and original design for a woven fabric, but especially in connection with a duck for lining shoes or  
15 other articles subjected to great wear; and the said design consists of the essential characteristics substantially shown in the accompanying drawings, and hereinafter more specifically described.

The leading feature of the design consists 20  
in the peculiar arrangement of the representation of a plurality of interwoven curved tapes or ribbons. This has been accomplished as shown in the accompanying drawings, wherein the tapes or ribbons are curved and  
25 intersect each other at irregular angles, leaving irregular spaces between the same, and at intervals so arranged as to intersect each other in the form of a square.

What I claim is—

30 The design for a woven fabric, substantially as herein shown and described.

In testimony whereof I affix my signature in presence of two witnesses.

JOHN THOMAS BARON.
