

```
channel values(int);

process Producer {
    int data[n];
    for [i = 0 to n-1] {
        do some computation;
        synch_send values(data[i]);
    }
}

process Consumer {
    int results[n];
    for [i = 0 to n-1] {
        receive values(results[i]);
        do some computation;
    }
}
```

Producer/consumer example using synchronous message passing.
