Student Computer Programmer Needed

We are in need of a student computer programmer to assist with a camera-based remote sensing system. Please see the add below for details. For additional information or to apply please contact Sky Dominguez at skyd@email.arizona.edu.

Student Computer Programmer for systems for camera-based remote sensing of forests from towers, starting immediately for fall 2015. Background should include computer programming (Linux, Windows, and low-level C++ programming for peripherals such as USB APIs) for data acquisition. Research credit and part-time funding is available to support working with a team for deploying cameras for remote sensing of forests from towers in tropical forests of Brazil.
