

# Title: Applications Technologist I - Raytheon

## Job Description:

Foundation Application Services (FAS) within Global Business Services (GBS) IT has an immediate opening for a User Experience (UX) Front End Engineer to support various functional areas of SAP.

This individual will be responsible for staying up to date on web technologies/techniques, building solid front-end architectures that integrate easily with other systems and technologies, understanding design patterns and write reusable, modular code, working closely with other disciplines (UX, Design, Engineering, QA), and having a solid understanding of cross-browser/platform issues and code solutions.

## Required Skills:

- Experience with JavaScript, jQuery, and AJAX
- Familiarity with developing in semantic HTML5 and CSS3, and comfortable with pre-processors
- Experience or familiarity with server-side scripting languages (PHP, Python, Ruby, etc.)
- An understanding of software development and test methodologies and processes
- Ability to team with and understand the needs of a complex customer base
- Demonstrated success building trust and strong relationships with partners and customers
- Exceptional communication skills, both written and verbal
- Proficiency in Microsoft Office, including familiarity with MS Visio

## Desired Skills:

- Familiarity with SAP ERP design
- Understanding of FAS processes
- Six Sigma Specialist qualification or familiarity
- Experience with building modern responsive web applications/sites in a professional environment
- Experience with developing in semantic HTML5 and CSS3, and comfortable with pre-processors
- Experience with JavaScript, jQuery, and AJAX
- Experience with server-side scripting languages (PHP, Python, Ruby, etc.)

## Required Education (including Major):

B.S./B.A. in Computer Science, Information Technology, Engineering, or Mathematics, or related discipline, or related experience.
