

Sandia National Laboratories, an employer on AfterCollege, would like to share the following opportunity with Arizona Department of Computer Science students.

As a top student in a technical discipline, you can anticipate many career opportunities as graduation approaches.

However, few of these opportunities can offer the potential impact of a career at Sandia National Laboratories. We do national security work that is beyond the scope or means of most private organizations, pushing frontiers at the edge of science and engineering in areas as diverse as cyber security, nuclear weapon systems, clean combustion, biotechnology, and sustainable energy.

If you are pursuing an undergraduate or graduate degree in **Science, Math, Engineering, Technology, Computer Information Systems, Cyber Security, or Management Information Systems**, we want to hear from you. Please submit your resume and application and get ready for the changes ahead.

Apply Online: <http://www.sandia.gov/careers/>

In addition to working at the forefront of technology on problems of real significance, you can expect competitive pay, top-notch benefits, and a work-life balance that gives you time to enjoy family, friends, and the rich cultural, educational, and recreational opportunities that surround our sites in Albuquerque, NM, and Livermore, CA.

Sandia National Laboratories
World-changing technologies. Life-changing careers.
